

NEWS RELEASE

Morgan Manufactured Solutions Launches as Premier Provider of Machined Components Delivering Finished Parts in 30 Percent Less Time

Full-service manufacturer for oil and gas industry to showcase solutions at Offshore Technology Conference

Lake Zurich, Ill. (April 23, 2014) – [Morgan Manufactured Solutions](#), the one-stop source for machined components, today announced it will introduce its comprehensive solutions during the Offshore Technology Conference, May 5-8 in Houston. An ISO and AS-certified manufacturer of finished products in bronze, stainless, cast iron, aluminum, Toughmet®, Beryllium Copper and carbon steels, Morgan Manufactured Solutions manages the entire manufacturing process, including heat treating, spray and laser coating, plating and machining.

“We are applying the 60-year experience of Morgan Bronze Products as Master Distributors of copper based alloys to launch Morgan Manufactured Solutions as a full-service solutions provider to the oil and gas, aerospace and construction industries,” said Ron Rogers, president of Morgan Manufactured Solutions and [Morgan Bronze Products](#). “With advanced automation and expert engineers and metallurgists on staff, we eliminate the need for multiple vendors and deliver finished parts in 30 percent less time than other suppliers. Our simplified, single-source process is hassle-free, effectively saving time and controlling costs for our customers.”

Morgan Manufactured Solutions provides computer-controlled precision machining, including turning, milling, grinding, lapping and EDM, with rigorous inspection tools and calibration systems. A complete inventory management system offers customers shelf replenishment and stocking services, from Kanban quantities to daily deliveries.

These exclusive services are backed by an extensive metals warehouse managed by sister company, Morgan Bronze Products, which offers quick and affordable access to the most unique alloys and sizes.

Morgan Manufactured Solutions will showcase its new services during the [Offshore Technology Conference](#) at Reliant Park in Houston, Booth #11401.

About Morgan Manufactured Solutions

Morgan Manufactured Solutions is the one-stop source for machined components – the critical parts that keep businesses running. An ISO and AS-certified Master Distributor of raw material in copper-based alloys, Morgan Manufactured Solutions (MMS) offers finished products in bronze, stainless, cast iron, aluminum, Toughmet®, Beryllium Copper and carbon steels. MMS manages the entire manufacturing process, including heat treating, spray and laser coating, plating and machining, with advanced automation to deliver finished parts in 30 percent less time. SOLUTIONS

- Expert engineers and metallurgists assist with entire manufacturing process
- Computer-controlled precision machining, including turning, milling, grinding, lapping and EDM, with rigorous inspection tools and calibration systems
- Inventory management – shelf replenishment and stocking services from Kanban quantities to daily deliveries
- Extensive metals warehouse offering quick and affordable access to the most unique alloys and sizes
- ISO 9001 and AS 9001 certified

KEY INDUSTRY COMPONENTS

- Aerospace
- Hydraulics and Pneumatics
- Commercial / Heavy Equipment
- Pumps, Valves & Actuators
- Oil and Gas
- Power Transmission Distributors & MRO Requirements
